

## HOW TO FOLD & CUT A SINGLE SHEET "T" BOOK

Any paper size will work, we are using 18"x24".

Fold paper in half creating a 9"x 24" shape (or a hotdog fold).

Unfold and fold in half the other way creating a 12"x18" shape (or a hamburger taco fold).

Continue folding to create an accordion fold 6"x18", it will have four folded section

Unfold the sheet and cut a "T" shape, beginning from the outside edge centerfold to the centerfold intersect.

Now cut along the center fold where you ended the first cut to the intersect of the quarter fold and then repeat in the other direction from the center point

To form a book begin folding from one of the cut sections and one by one follow the direction of the folds and you will end up with a 6"x9" book.

Please try various paper sizes and folding patterns. Several book making books have numerous patterns for this format.
